## SKILLS

Core Skills
- Programming Languages: Python, JavaScript, SQL
- Frontend: HTML, CSS, React.js, Next.js
- Backend: Django, Flask, REST API Development
- Database: MySQL, PostgreSQL, MongoDB
- Tkinter, PyQT, Kivy

Data Handling and Analysis
- Pandas
- NumPy
- Data Visualization (Matplotlib, Seaborn)

Automation and Scripting
- Web Scraping (BeautifulSoup, Scrapy, Selenium)
- Task Automation with Python

Tools and Version Control
- Git, GitHub
- Docker
- CI/CD Pipelines

DevOps:
- Docker, AWS (EC2, S3)
- Git
- CI/CD (GitHub Actions)

## SUMMARY

Dedicated and adaptable Full-Stack Developer with a proven track record in building user-friendly, scalable, and high-performance web, mobile, and desktop applications. Skilled in managing the full development lifecycle, from planning to deployment, while collaborating effectively with cross-functional teams. Recognized for strong problem-solving abilities, attention to detail, and a commitment to delivering innovative solutions on time. Continuously driven to enhance technical expertise and thrive in dynamic, fast-paced environments.

## WORK EXPERIENCE

### Interco
**Software Engineer**

08/2020-Present
USA

- Developed scalable web applications using React.js, Django, and Flask, improving system performance by 40%.
- Optimized MySQL, PostgreSQL, and MongoDB databases, reducing query times by 35%.
- Implemented CI/CD pipelines with GitHub Actions and enhanced app performance to handle 100,000+ users.
- Led a team of 5 developers, conducting 30+ code reviews monthly and delivering high-quality projects.

### Id Nube
**Junior Full Stack Developer**

01/2021-03/2021
Mexico

- Designed and implemented responsive web applications using HTML, CSS, and JavaScript, enhancing user experience and engagement.
- Built and deployed backend services with Django and Flask, improving system efficiency and reducing downtime by 30%.
- Managed databases with MySQL and MongoDB, optimizing storage and retrieval operations.

### Fiverr
**Freelance Full Stack Developer**

08/2020-Present

- Delivered 50+ web, desktop, and mobile applications using Python (Django, Flask) and JavaScript (React.js, Next.js), achieving 95%+ client satisfaction.
- Built robust web scraping tools with Selenium, BeautifulSoup, and Scrapy for data extraction and automation.
- Consulted with 100+ clients, analyzing their requirements and delivering tailored solutions, resulting in a 40% repeat engagement rate.
- Developed desktop applications using Tkinter and PyQt5, ensuring intuitive user interfaces and efficient functionality.
